

Better Data, Better Health

Delivering Real-World Evaluation and Screening of Disease in a Fast and Convenient Way.

About Us

Avricore is a total health innovator capitalizing on technological advancements and consumer health trends, offering consumers, health providers and life-science companies the ability to take control of both spending and health outcomes.

Leading the Way

We intend on becoming the world's largest health data company and are utilizing point-of-care technologies within community pharmacy to achieve this. To learn more, visit us at www.avricorehealth.com.

Quick Snap

We generate revenues from the distribution of our systems and associated supplies, as well as revenue from conducting tests, de-identified health data and software

- ▶ The Company's primary focus today is on developing a network of point-of-care analyzers that utilizes its HealthTab™ software in community pharmacy.
- ▶ We are capitalizing on established consumer trends, technology advancements, health policy and industry changes to solve a business headache and meet a large market opportunity.

- ▶ The Company has tested and developed its technology and is in the commercialization stage, expanding into more pharmacies in Canada and around the World, with the intent of becoming the leading provider of point-of-care testing in pharmacy and real-world evidence studies.
- ▶ Avricore Health earns revenues from a variety of streams via the HealthTab™ + RASTR Network including:
 - Equipment Leasing
 - Consumables
 - API Integration (Software)
 - Screening Tests
 - Data

Built for Success

- Proven point-of-care screening system, designed to support pharmacists evolving role.
- Empowers patients to be proactive about their health by directly measuring and monitoring key safety tests and biomarkers of chronic disease.
- Simple, fast, lab-accurate, and requires just a few drops of blood from a finger stick.
- Results can be printed in-store or accessed securely online.
- Watch short video here and visit our HealthTab™ website.

► Our fully customizable platform allows us to develop unique programs for clients in different jurisdictions to suit their requirements. Also, our in-pharmacy network allows us to secure steady revenues, plus offer the world's first permanent network of real-world evidence data collecting analyzers to researchers.
